

Welcome to Domack Restoration

CERTIFIED. QUALITY. INTEGRITY.

Certified Commercial Roofing and Restoration Contractors

We Pride Ourselves On Doing It Right The First Time.

Delivering outstanding quality and service
for five decades across two generations.

**WE ARE PROUD TO PUT OUR
FAMILY NAME ON OUR WORK.**

WHO IS DOMACK?

Domack Restoration, LLC is a family-owned and operated commercial roofing and restoration company. We've focused our business entirely on commercial roofing, establishing ourselves as the "go to" industry experts. Our business has evolved over nearly 50 years, building on our good name and reputation for quality and unsurpassed excellence. Established in Connecticut in 1974, Domack has expanded to serve clients in nearby New York counties and throughout New England.

As a family-owned business, we have been able to maintain tight controls over the quality of our workmanship, the quality of the products we use, and the excellence with which we deliver them to our clients.

Whatever your commercial roofing needs are, at Domack Restoration, we use a diverse set of commercial roofing services, materials, and installation techniques to deliver the right solution within your budget.

OUR SERVICES INCLUDE:

- Waterproofing / Air Barrier
- Roofing Installation
- Maintenance and Restoration
- Preventative Maintenance

When you choose Domack for your project, you're choosing the best.

After all, our name is on the line.

ROOFING INSTALLATION AND SPECIALTIES

Whatever your commercial building needs are, at Domack Restoration, we use a diverse set of commercial roofing services, materials, and techniques to deliver the right solution in your budget.

Single-ply roofing systems are manufactured with strict quality control requirements and offer strength, flexibility, and durability that outdated older materials, like tar paper cannot.

- Thermoplastic Polyolefin (TPO) – considered the gold standard of roofing materials.
- Polyvinyl Chloride (PVC) – time-tested and still a popular roofing system.
- Ethylene Propylene Diene Monomer (EPDM) – a solid choice for single-ply roofing.

MODIFIED BITUMEN ROOFING is a modern alternative that provides protection for a commercial building. This type of asphalt product installs well in the variable temperatures of any season.

TAPERED INSULATION SYSTEMS with PVC and TPO reinforced roof membranes are long-lasting and prevent the extensive damage that standing water on a roof can cause.

STANDING SEAM METAL ROOFING is an excellent weathertight and durable roofing option.

ASPHALT SHINGLE ROOFING is a cost-effect and waterproof option.

SYNTHETIC SLATE ROOFING by EcoStar offers sustainable, aesthetic designs.

WATERPROOFING

Below-grade waterproofing is the construction practice of applying membranes and coatings to the foundation walls, slabs on grade, and plaza decks. Together, these waterproofing practices achieve:

- Structural support for the building.
- Environmental control by managing air flow, moisture, heat, and sound.
- Finish functions for the final appearance you seek that stands up to wear and tear.
- Distribution functions that enable utilities, such as power, water, gas, and air conditioning, into the building.

Domack offers six types of waterproofing to fit your project design, aesthetics, and budget.

- Cementitious waterproofing
- Liquid waterproofing membrane
- Bituminous waterproofing
- Bituminous coating waterproofing method
- Bituminous membrane waterproofing method
- Polyurethane waterproofing

AIR BARRIER AND SPECIALTIES

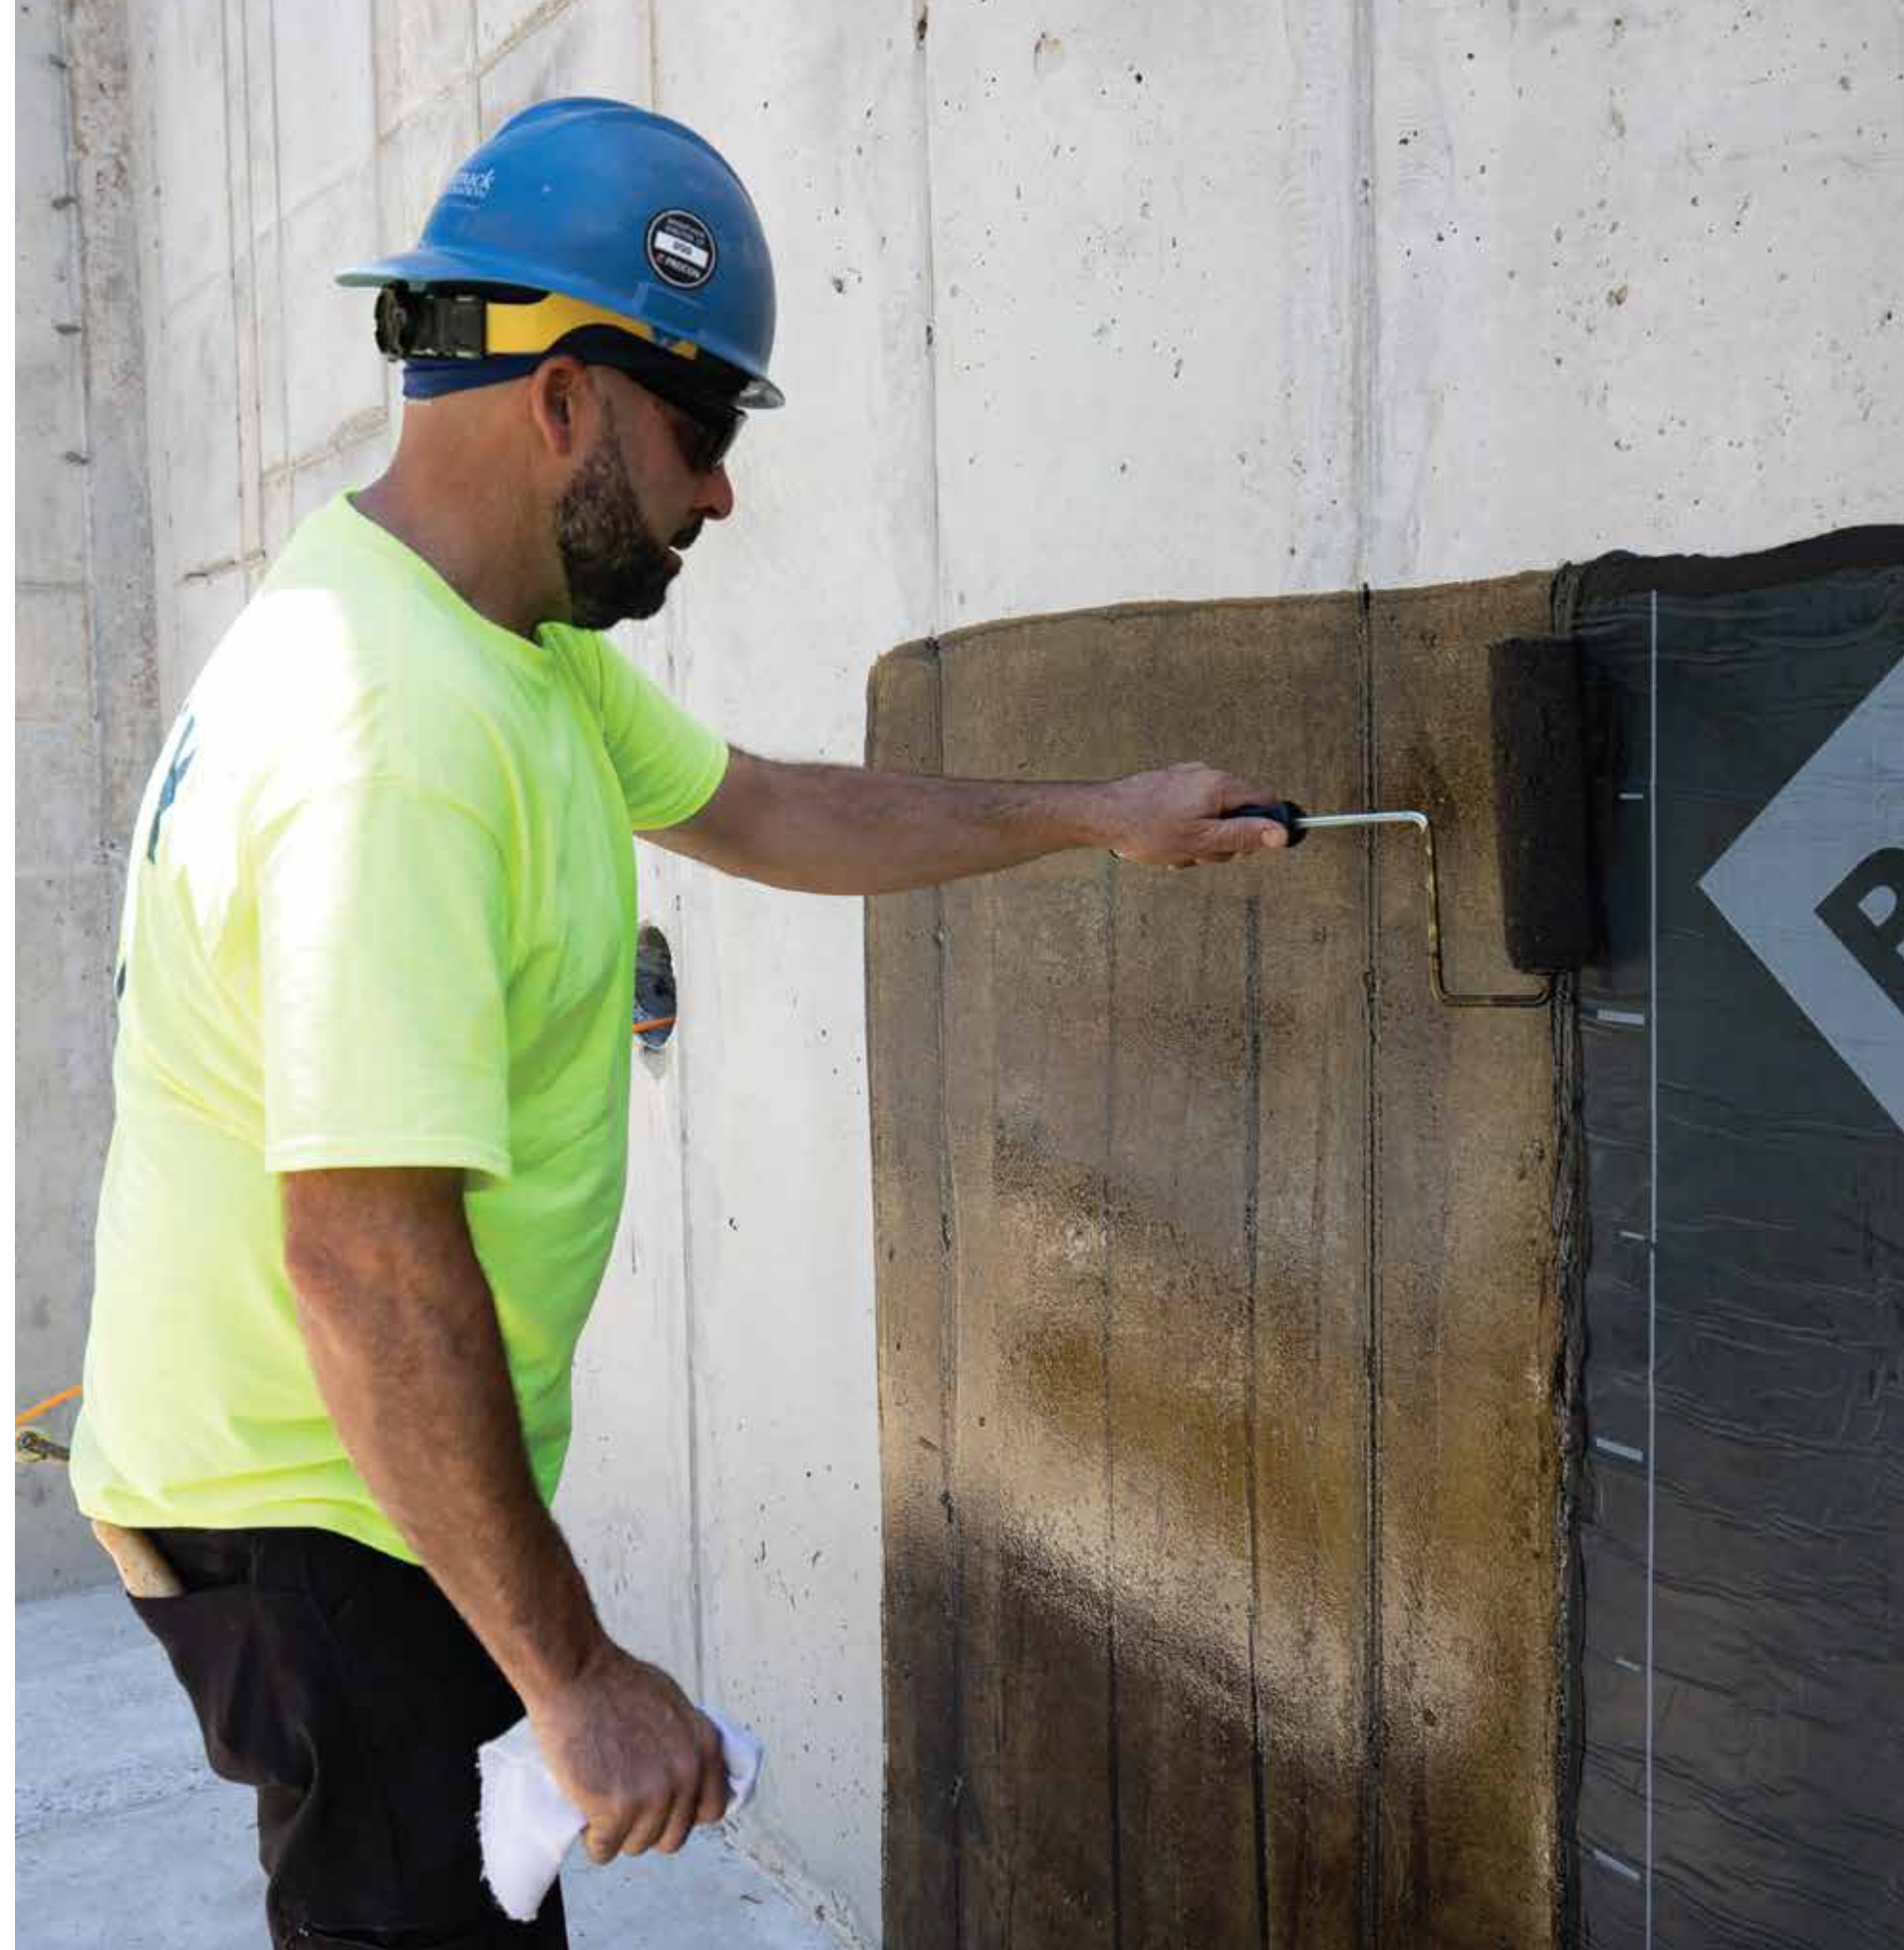

Domack works with several types of air barrier systems. A mechanically attached membrane, or building wraps, made of polyethylene-fiber or spun-bonded polyolefin is generally accepted as both a moisture and air barrier.

Domack offers a variety of air and moisture barriers to fit your project.

- Fluid applied air barriers
- Self-adhered air barriers
- Adhesives and primers
- Flashing
- Sealants

MAINTENANCE, RESTORATION AND SPECIALTIES

Domack Restoration, LLC is a family-owned and operated commercial roofing and restoration company established in Connecticut in 1974. We've focused our business entirely on commercial roofing, establishing ourselves as the "go to" industry experts.

When you need maintenance or repairs for your roof, you can count on our experienced team to be responsive, honest, and thorough in their assessment of your needs.

EMERGENCY ROOFING REPAIRS – stop leaks with a temporary fix or a long-term resolution to your problem.

ROOF DRAINS – move water buildup off your roof to prevent damage.

INFRARED THERMOGRAPHY – improves efficiency by measuring and remediating heat loss through the roof.

ROOF COATINGS – provide protection with flexibility for expansion in response to storm conditions.

MOISTURE DETECTION – identifies and resolves trapped water that can cause mold and deterioration.

PREVENTATIVE MAINTENANCE

When you choose Domack Restoration for your project, you're choosing the quality and excellence that only a local family-owned company can provide.

Preventative maintenance helps keep your roof in optimal condition and can potentially add 10 years to the lifespan of a roof. At an average cost of 14 cents per square foot, that could mean substantial savings over the 21-year life of a roof. Our goal is to keep your building safe, dry, and free of damaging leaks.

OUR SERVICES INCLUDE:

- Waterproofing
- Roof inspections
- Leak detection
- Leak repairs
- Slate restoration
- Preventative maintenance programs
- Snow removal

ROOF LIFESPAN WITHOUT MAINTENANCE

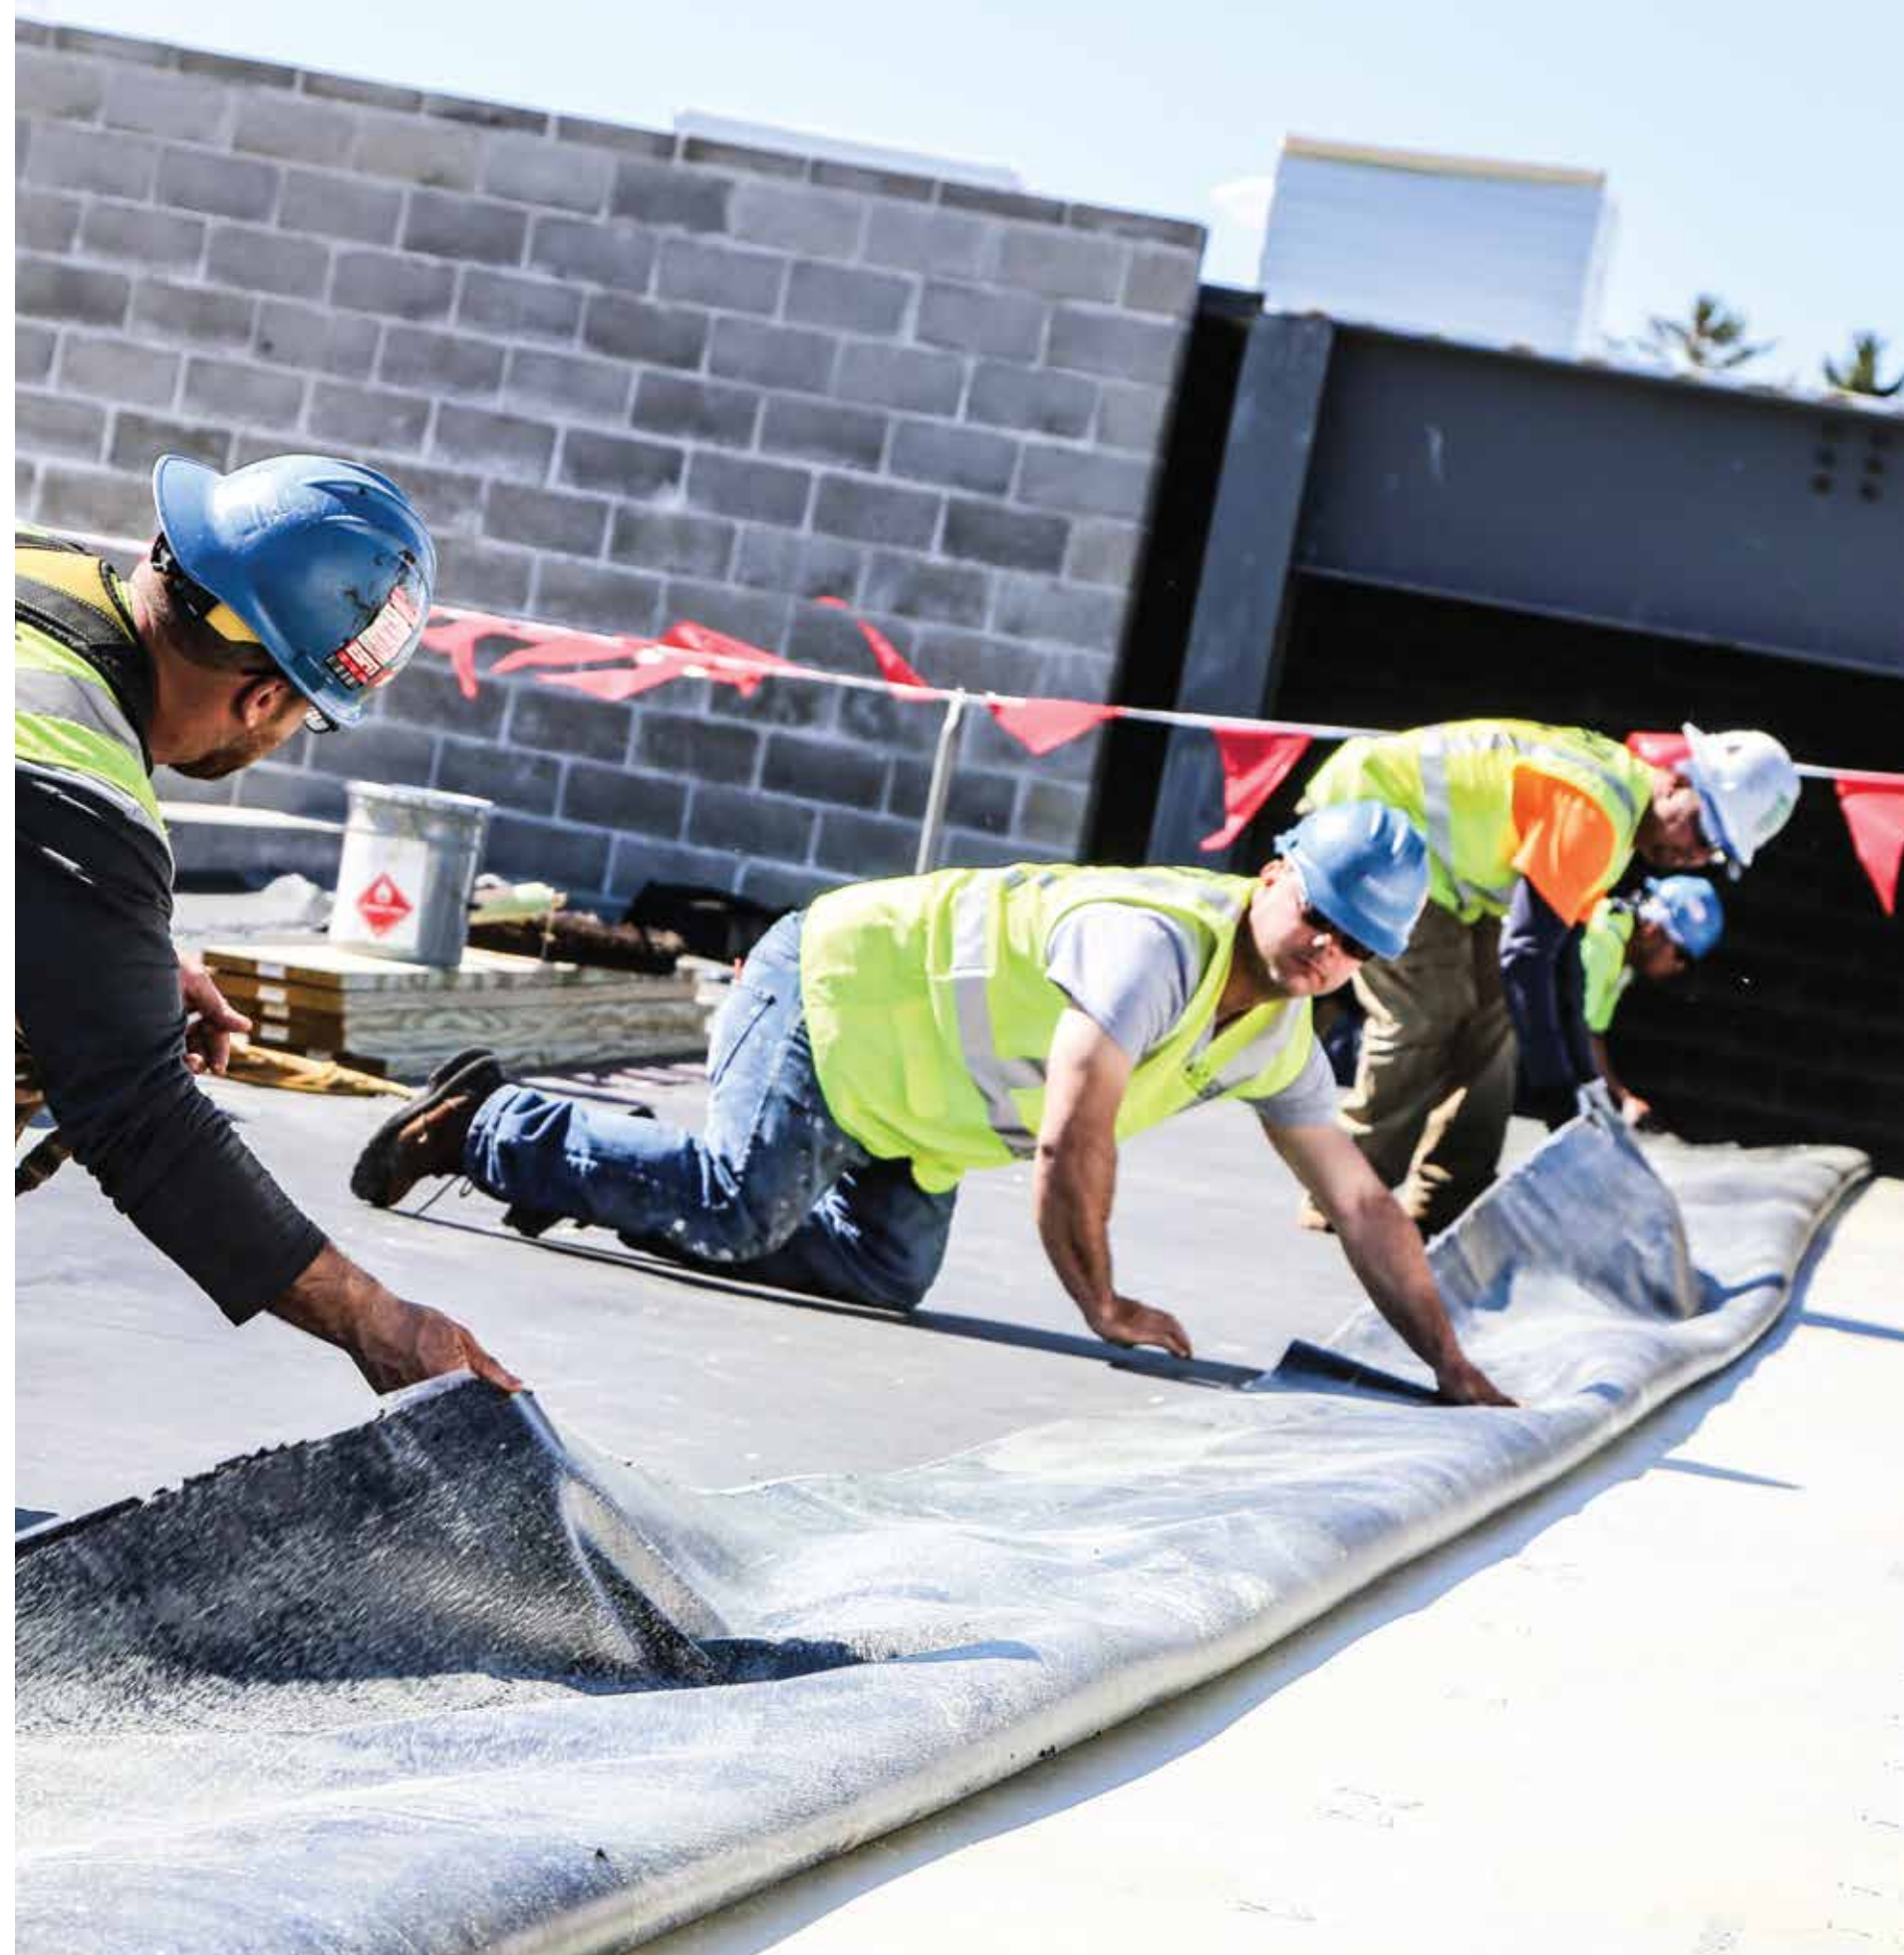

11 years with lifelong
maintenance costs of
25 cents per square foot.

ROOF LIFESPAN WITH MAINTENANCE

21 years with lifelong
maintenance costs of
14 cents per square foot.
