Ways We Can Help

While many Care Managers are social workers, Lisa Cheney is a nurse and patient advocate. She is in the best position to provide the trusted support you need. You pay directly for these services, so we remain independent and objective working in your best interests.

- We understand the health care system. We facilitate communication with doctors to get the care and support you want and deserve and save you time and money matching you to services you need.
- We assist with sorting out deductibles and co-pays and identify potential duplications in services for Medicare, Medi-gap, Part D, and Medicare Advantage .
- We can help you navigate Long Term Care insurance policies.
- Staying at home and aging in place safely can be an option. We know the area resources and can assess your situation and propose a variety of options based on safety, finances, and personal preferences.

Call Lisa Cheney for an assessment.
